

Quality You Can See

Profit You Can Count

falgro[®] 4 SL

Falgro[®] 4 SL is a natural plant growth regulator containing **gibberellic acid** (GA₃). When applied pre-harvest in citrus, it significantly improves **fruit set and rind quality**, helping growers increase their marketable yield of Class 1 fruit and **pack more cartons** of export-quality produce per hectare.

Natural plant growth regulator containing gibberellic acid 3 (GA₃), 32 g/L.

Improves Fruit Set: Increases sink strength of developing fruit, outcompeting other parts of the plant.

Enhances Nutrient Flow: Directs sugars and carbohydrates to fruit for better growth.

Reduces Fruit Drop: Maintains hormone balance during natural or "November drop".

Promotes cell division and cell wall plasticity leading to the elongation of cells in the fruit, thereby decreasing rind creasing.

No MRL Restrictions: Safe for export markets.

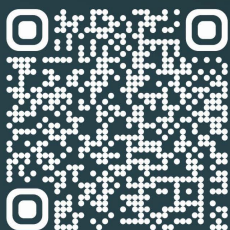

Improves marketable yield of class 1 fruit. Higher Pack-Outs: More Class 1 cartons per hectare.
